

What Types of Pain/Issues Does it Help?

The Electro-Proscope has been known to relieve pain and neuromuscular symptoms such as the following:

- Arthritis
- Body Trauma
- Back Injury
- Broken Bones
- Bursitis
- Carpal Tunnel Syndrome
- Detoxification
- Disc Injuries
- Headaches
- Lymph Blockage
- Menstrual Cramping
- Pain (acute/chronic)
- Post-operative Pain
- Scar Tissue Repair
- Sciatica
- Sports Injuries
- TMJ
- Tendonitis

...and many more

Other Testimonials

Rachel Buehler – 2008 US Gold Medalist in Women's Soccer (sprained ankle)

Kameron Loe – Major League Pitcher for the Milwaukee Brewers (Disc and elbow issues)

Ted Lilly – Major League Pitcher for Los Angeles Dodgers (pitching arm injury)

Dr. Stephen Sinatra, MD
Board Certified Cardiologist, Nutritionist and Author of "The Sinatra Solution" says;

"The Acuscope and Myopulse Modalities can help with detoxification, energy production, and cell ATP fortification in cells. They offer an alternative healing Methodology that really works".

Electro-Proscope (Acuscope/Myopulse)

ReJen Health

- Pain Management
- Sports Rehabilitation
- Detox at Cellular Level
- Increases Range of Motion Quickly
- Relieves Swelling, Pain & Inflammation

Electro-Proscope (Acuscope/Myopulse)

HOW IT WORKS?

Energy flows constantly between cells in the human body. When minute amounts of electrical energy are delivered to the cell, ATP (which helps the cell maintain its normal conductivity) increases and the healing process is accelerated.

The Electro-Proscope is a micro-current electrical stimulation modality that has an input/output mechanism in order to scan the electrical property of the cell membrane in body tissue.

This unique feature allows it to detect blockage, impedance and imbalances in areas of the body. Based on biofeedback the Electro-Proscope will send out a corrective frequency at a millionth of an ampere or lower to encourage the damaged cell to resonate at the desired normal healthy frequency.

WHO IS THIS FOR?

- Those who have not had success with other treatments/modalities
- Those seeking to take less prescription pain medication
- Those who would like to recover faster from injuries, surgery or trauma
- Those seeking detoxification at a cellular level

WHAT TO EXPECT?

Each session is approx. 60-90 minutes long. Two probes or plates are placed with botanical based conductive gel onto the body. A micro-current is comfortably introduced to the affected area(s). Depending on the severity or degeneration will determine the number of sessions required to see results (3-12 are standard).

ANY SIDE EFFECTS?

There are no long term side effects. Occasionally, some discomfort such as headache, slight nausea or flu like symptoms are apparent. There may even be some increase in pain level at first, fortunately these side effects are rare and usually only follow the first 1-3 sessions.

This is all GOOD NEWS! Any change including temporary discomfort is an indication the body is in a "healing crisis" detoxifying and regenerating to its normal healthy state.

TESTIMONIALS

"I had a severe problem with a painful and very stiff neck and shoulder. Fortunately I was introduced to Jenny Garbutt, who trained in the use of the Electro-Proscope. I arranged a visit and found Jenny to be very professional in her approach. She communicated very clearly and concisely how the session would work, what it consisted of and my expected outcomes and discussed how she would use the Electro-Proscope to achieve this.

After 2 sessions I felt a definite improvement in my injured neck and shoulder area. I now have returned to my pre-injury range of movement and feel I am improving daily. The session was non invasive, non -threatening, effective, comfortable and confidential. I would recommend this as an alternative treatment."
—Alan Birtles

"I had 3 sessions with Jenny and the Electro-Proscope. I did have considerable back pain but after my series of sessions I experienced considerably less pain and was able to do activities which before had been extremely difficult to accomplish. I appreciated that the sessions were non-invasive. Jenny thoughtfully guided me through what she was doing and willingly answered any questions I had."
—Pat Helm
